DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a contact pressure, classified in class 73, subclass 777.
 - II. Claims 11-20, drawn to method of manufacturing a contact sensor, classified in class 29, subclass 593.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and of I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make other related sensor such as acceleration or fluid pressure sensor. The contact pressure sensor of the claims of Group I can be made in variety of different ways such as changing the orders of the various steps or use alternative dispositions methods. Moreover, the apparatus of the Group I only recites elements of a structure, whereas the limitations of claims of Group II directed to various manufacturing methods which are not of general concern to the end product of the claims of Group I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for

Art Unit: 2855

each Group is not required for the other Group, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
